

Due to electrical brownouts, we are turning off the AC to all 3 Clubhouses until we receive feedback from TECO about this issue.

This is a preventative measure to protect our AC equipment.

We will provide updates as to when this issue is addressed and the AC's can be turned back on.

We appreciate your patience.

KINGS POINT

AFTER THE STORM:

We hope everyone made it through the storm unharmed and are safe.

We did it guys. We weathered a beast of a storm, that could have been much worse, so we hope you join us in counting our blessings today.

We are relieved to report that your amenities sustained little to no damage, but Irma left a heck of a mess in her wake.

To allow staff to begin the cleanup process and create a safe environment for our residents to return to, all Clubhouses will remain closed and Transportation Services cancelled through Tues., Sept. 12. We will resume normal operations on Wed., Sept. 13.

We know some of you will have damage to report and landscaping clean up requests, so we ask that you direct them to the appropriate channels so they can be addressed as soon as possible.

We ask for your patience as we all work hard to get back up and running.

We will get through this together.
